# CONSTRUCTION UPDATE

June 2017

## TRAFFIC LANES TO BE REDUCED AT 4100 SOUTH & 5600 WEST INTERSECTION

The Mountain View Corridor construction team is beginning work to widen the 4100 South and 5600 West intersection. This work will require lane restrictions at the intersection while construction takes place. Please see the map for more information.

The traffic lanes are scheduled to be reduced as early as June 12 and will continue through the duration of the project (Fall 2017).

Please slow down and use caution while driving through the new traffic patterns at the intersection. Traffic shifts may also occur intermittently throughout the summer at this intersection.

Pedestrian routes will be altered during construction. Please follow signs and designated pedestrian walkways during construction.

For more information on construction, please contact the Mountain View Corridor team at 1-800-596-2556 or at [mountainview@utah.gov](mailto:mountainview@utah.gov).
